

Equipment Identification

The equipment list below presumes that you have a TV, Projector or some means of display available at your squadron already.

This event requires 4 pieces of equipment; A Nintendo Switch, HDMI cradle and cable, controllers x 4, Mario Kart 8 deluxe (Game)

A Nintendo Switch: is a game console, essentially the computer that runs the game and allows interaction between the software and the Controllers

HDMI Cradle and cable: transfer the display from the screen on the console to a larger display. this item isn't 100% necessary as the console has an integrated display but for group activities is a nice to have.

Controllers: Ideally 4 x controllers for group practice rounds, but 2 are needed for the competition itself.
