

Equipment Cost

The equipment list below presumes that you have a TV, Projector or some means of display available at your squadron already.

This event requires 4 pieces of equipment; A Nintendo Switch, HDMI cradle and cable, controllers x 4, Mario Kart 8 deluxe (Game)

There are many routes you can take to source the equipment; second-hand eBay, CEX/trade shops, new purchase Argos, and Game to name but a few.

Whatever option you take will cost you upwards of £200, you could alternatively source from your cadets, or speak with one of the other squadrons involved to see if you can jointly host the competition. (although you would still need to produce cups and a winner from your squadron).
